

OXYGEN MUSIC LESSONS

Music Stimulates the Brain

Scientific research supports the theory that learning to play an instrument can benefit your child's education.

Some of the many advantages of music lessons are:

- Enhancing the learning process in young minds
- Children learning an instrument, compared to those who do not, show greater flexibility in maths and reading
- Developing discipline, encouraging patience, and improving co-ordination skills
- A sense of enjoyment and accomplishment through the playing skills acquired during lessons

Why not give your child a positive experience at precisely the age it will have the most impact through the gift of music lessons. Suitable for Grade 1 students and above.

With a reputation spanning over 35 years, Oxygen Music Lessons is offering private lessons at your child's school. Lessons are held during school hours, using a rotating roll to ensure students are not missing from the same class each week.

PIANO

Oxygen Music Lessons provides quality education on piano across a wide range of styles and learning disciplines.

GUITAR

Oxygen Music Lessons has an excellent range of teachers ready to educate students on Acoustic, Electric or Bass guitar.

**Please note, not all schools offer both instruments.*
